EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jerald Nagae on September 8, 2006.

The application has been amended as follows:

In claim 1, line 20, "interior" has been changed to -inner--.

Remarks

2. The above amendment was made to reconcile the correct limitation term used throughout the claims.
3. Applicant's amendment and arguments in support thereof dated June 13, 2006 have generally been found persuasive.
4. While Price is available as prior art, see 35 U.S.C. 102(e)(1) ("the invention was described in an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent"), Applicant is correct that the reference does not teach or suggest "the inner hem is connected to the outer insertion flange such that the inner mating flange and the outer mating flange are

aligned to form substantially one plane." Furthermore, as pointed out by Applicant, Walsh does not teach what is missing from Price.
